

the JACKDAWG™

Landing Gear Lock

Trailer Protection

The JACKDAWG™ Landing Gear Lock quickly covers and disables the handle swivel joint, preventing rotation required to raise or lower the landing gear. Most thieves don't have time for this obstacle.

Concealed shackle padlock prevents tampering!

- Solid Steel Construction
- No moving parts - one solid piece!
- Compact design - easy to store.

Patent Pending

- Unique
- Simple
- Effective!

Also great for warehouse operations to control cargo release. Different colors available for coding schemes. Available as a version for use with a standard padlock. A high security lock is recommended.

Exclusively manufactured by Mid-America Manufacturing
