# STRONG, SAFE, VERSATILE

There are countless uses in machining, fabrication, and maintenance for these heavy-duty, infinitely adjustable, work supports. They are great for supporting irregular work pieces and can help to significantly reduce valuable spindle downtime due to machine set-up or part changeover.

## Product feature & benefits:

- Reduces set-up time by up to 15%
- Compact and easy to store. Eliminates the need for multiple blocks and shims.
- Infinitely adjustable height can be locked in place for multiple part runs.
- Multiple contact points for different support applications.
- Secure with keepers for part locating repeatability (vertically or horizontally).
- Made from strong 1144 stressproof steel
- Load tested to exceed 40,000 pounds
- 4 sizes cover a height range from 2" to 24".
- Quality made in the USA.
